

WHAT IS RADON?

Radon is a hazardous, naturally occurring gas.

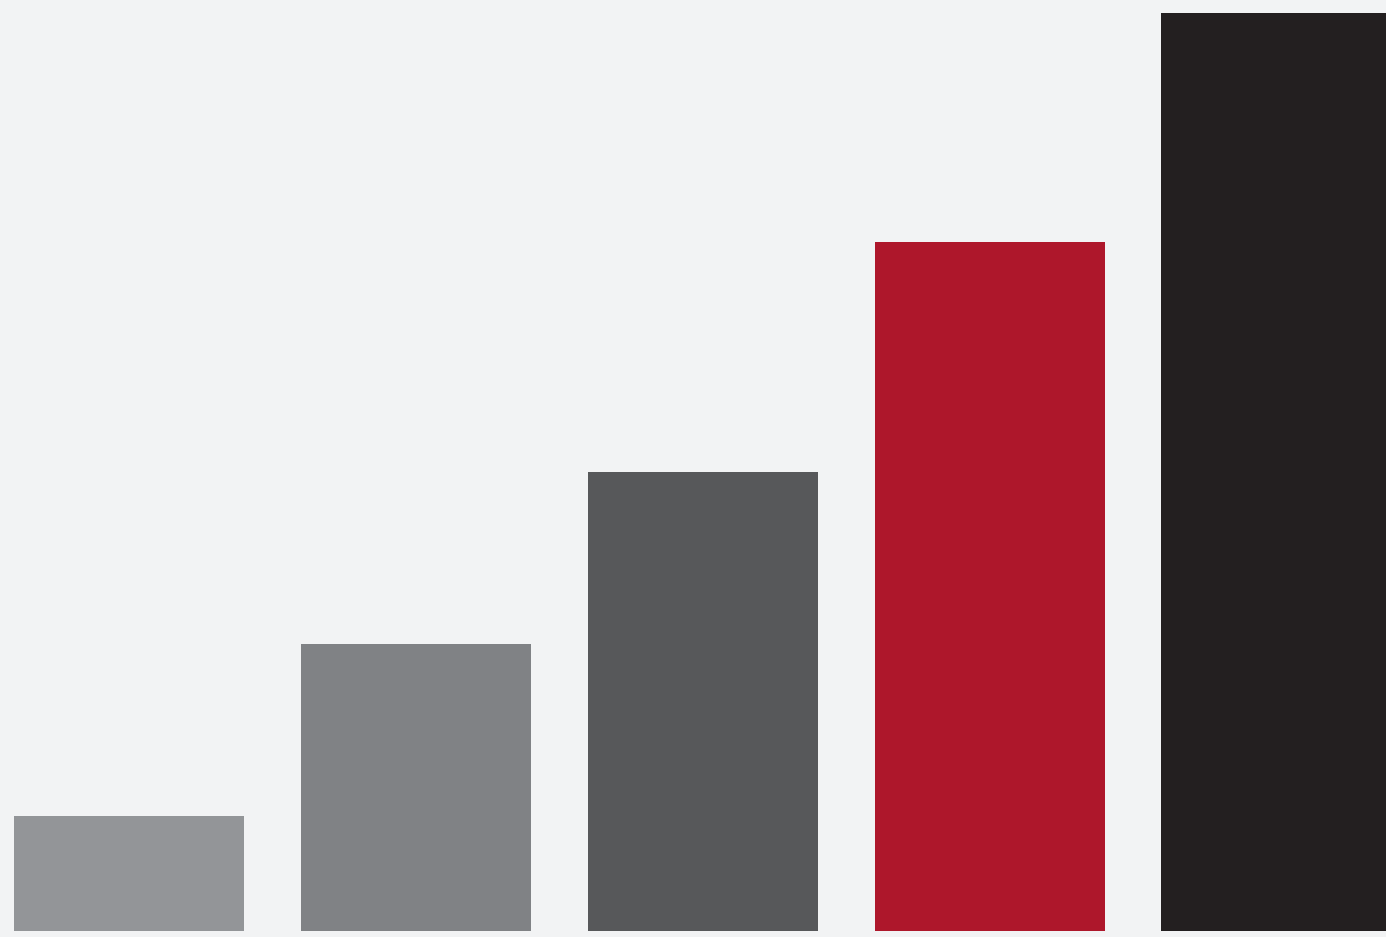

Radon results from the decay of trace amounts of uranium found in the earth's crust.

Radon can be present in well water, building materials, public water supplies and outdoor air.

RADON IS...

colorless, odorless, & tasteless

RADON is the second leading cause of lung cancer in the U.S. after smoking.

IN THE U.S. ALONE,

Radon is responsible for around

20,000

lung cancer deaths per year.

Radon is present in

1 OF EVERY 6

homes in the U.S.

TAKE ACTION NOW.

here's how we can help,

services we provide at National Radon Defense

Radon Mitigation

Radon Testing

Mitigation Inspection

Vapor Intrusion
